STOCK FOR SALE IN 2020

- Ram Lambs
- Shearling Rams

ABOUT OUR FLOCK

Established 2002 and based in Tamworth in Arden, we aim to produce fast growing lambs with a high muscle depth and low fat, to be ready for the early lamb market. This also applies to our sheep we sell into the commercial and pedigree market for breeding. To assist in this, we also introduced bloodlines from New Zealand. All sheep are grass fed only during the spring, summer and autumn. We consistently have rams and ewes in the top 5% of the breed Terminal Sire Index. We are happy to export as our sheep have a high health standard and we have stock for sale in 2020. Currently available are ram lambs and shearling rams for commercial use.
