### Performance Recorded

### STOCK FOR SALE IN 2020

- Shearling Rams

### ABOUT OUR FLOCK

Established 2003 and based in Northumberland, our breeding aims are low input and good output. Our sheep lamb outside in April, are never housed throughout the year and fed on forage only. We use high EBV tups that produce hardy, vigorous lambs that grow fast, all grass reared. The ewes need to raise good lambs and lamb easily. The shearlings we produce are fit to tup 80 ewes easily. We hold a successful on farm sale in the autumn every year to commercial farmers where we sell up to 15 shearling rams. Many are repeat buyers who also pass on their experience with Hamps, word of mouth is a good way of getting new buyers. Please contact us direct if you would like more details for 2020 sales and stock for sale. The flock also won the Eblex greatest gain in 2014.
